### ABOUT THE ARTISTS...

**ALICIA AUSTIN:** a short, copper-haired cytotechnician who lives in Los Angeles with two Siamese cats and a growing collection of turquoise jewelry and Japanese swords. She has illustrated many fanzines, as well as books, and the new science fiction magazine, Vertex.

**GEORGE BARR:** a free-lance artist with many book covers to his credit, he is also a fine pianist, and composes his own music. He also designs personal items such as stationery, book plates and posters on order. His hobbies include collecting netsuke, gourmet cooking and old movies.

**GREG BEAR:** a talented young man with an avid desire to become a novelist, he has designed programs for the San Diego planetarium, plus many things for the local college and book stores. His interests, which are many, include music, travel and atrocious puns.

**GREG JEIN:** a meticulous miniaturist working on special effects for TV commercials and movies, he has expressed the laudable ambition of becoming Emperor of the Universe, if Lora Trimble doesn't beat him to it. Greg lives in Los Angeles, where he free-lances for several studios.

**BJO TRIMBLE:** a free-lance graphics artist for many years, her particular abilities were put to use in the layout and pasteup of the CONCORDANCE and this Color Book. She contributed the tribbles on page 3.
